TITLE - KDTree vs QUADTree Analysis

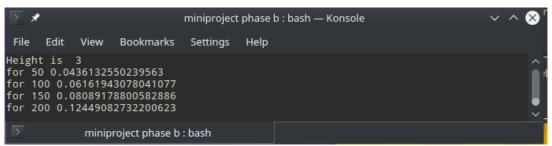

Experiment 1 –

Height of Trees in each experiment has been included in the screenshots of other experiments and not done individually.

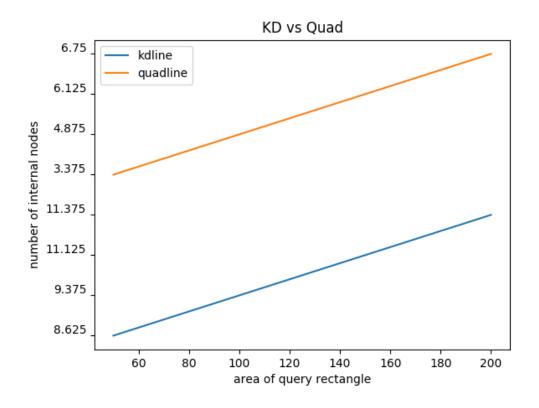

- 1. Parameters
 - a. Alpha = 50
 - b. Dataset = A
 - c. Algorithms used Kdtree and Quadtree

1.1 KD Tree height and running time

1.2 Quad Tree Height and running time

1.3 KD Tree vs Quad Tree Comparison

2. Parameters –

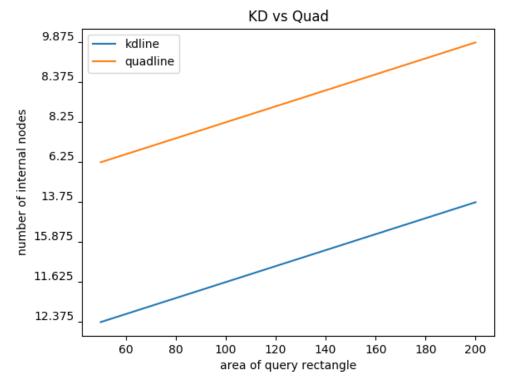

- a. Alpha = 50
- b. Dataset = B
- c. Algorithms used Kdtree and Quadtree

```
Height is 7
for 50 0.030305415391921997
for 100 0.07488995790481567
for 150 0.08270391821861267
for 200 0.11897468566894531
[50, 100, 150, 200] [12.375, 11.625, 15.875, 13.75]

miniproject phase b: bash
```

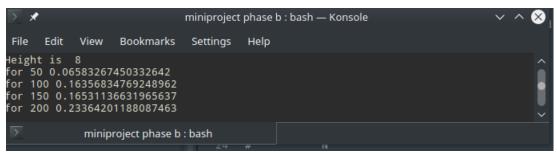

2.1 KD Tree height and running time

2.2 Quad Tree height and running time

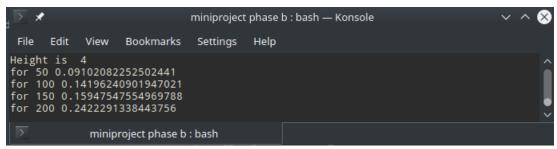

2.3 KD tree vs Quad Tree comparison

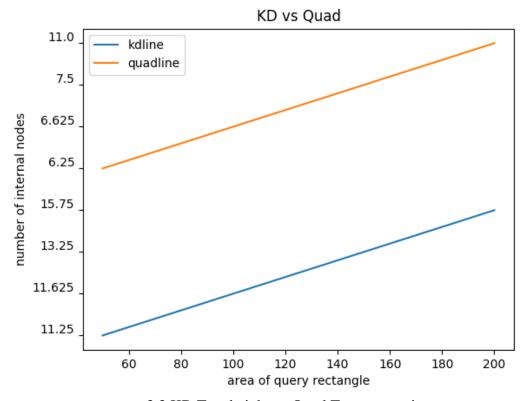

- 3. Parameters
 - a. Alpha = 50
 - b. Dataset = C
 - c. Algorithms used Kdtree and Quadtree

3.1 KD Tree height and running time

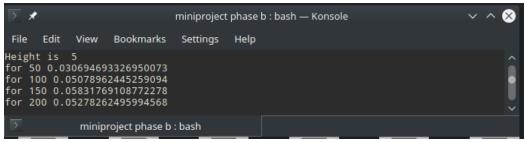

3.2 Quad Tree height and running time

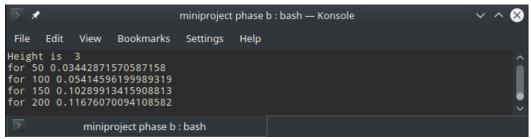

3.3 KD Tree height vs Quad Tree comparison

EXPERIMENT 2 -

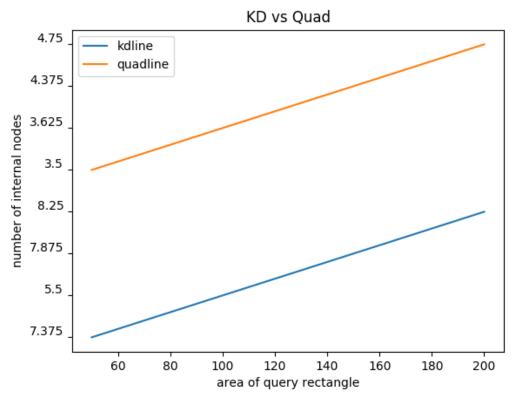

- 1. Parameters
 - a. Alpha = 150
 - b. Dataset = A
 - c. Algorithms used Kdtree and Quadtree

1.1 KD Tree height and running time

1.2 Quad Tree height and running time

1.3 KD Tree height vs Quad Tree Comparison

2. Parameters –

- a. Alpha = 150
- b. Dataset = B
- c. Algorithms used Kdtree and Quadtree

```
Height is 5
for 50 0.06146442890167236
for 100 0.07843843102455139
for 150 0.11397069692611694
for 200 0.09581133723258972
[50, 100, 150, 200] [7.875, 6.75, 7.0, 8.25]

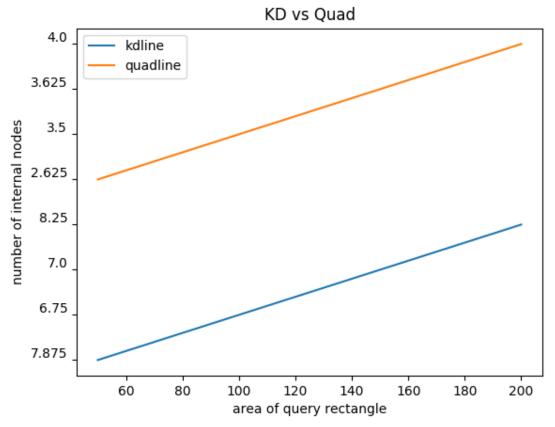

miniproject phase b: bash
```

2.1 KD Tree height and running time

```
Height is 3
for 50 0.0721864402294159
for 100 0.12269189953804016
for 150 0.17302948236465454
for 200 0.20112615823745728
[50, 100, 150, 200] [2.625, 3.5, 3.625, 4.0]
simar@simar-Inspiron-3537 /media/simar/52D45E15D45DFC23/Users/harsi/Desktop/PGLAB/miniproject phase b $ ■

miniproject phase b : bash
```

2.2 Quad Tree height and running time

2.3 KD Tree and Quad Tree comparison

3. Parameters –

- a. Alpha = 150
- b. Dataset = C
- c. Algorithms used Kdtree and Quadtree

```
d.

Height is 6

for 50 0.09337809681892395

for 100 0.15272033214569092

for 150 0.08317461609840393

for 200 0.2221452295780182

[50, 100, 150, 200] [9.0, 9.375, 8.625, 10.75]

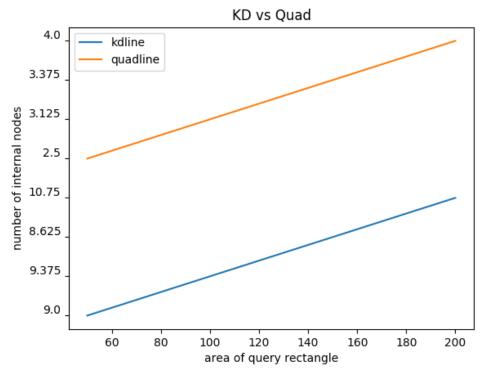

miniproject phase b: bash
```

3.1 KD Tree height and running time

```
Height is 3
for 50 0.11415848135948181
for 100 0.2407645583152771
for 150 0.28293269872665405
for 200 0.37047240138053894
[50, 100, 150, 200] [2.5, 3.125, 3.375, 4.0]

miniproject phase b: bash
```

3.2 Quad Tree height and running time

3.3 KD Tree And Quad Tree Comparison
